ENGINEERING STRUCTURES

Index to Volume 15 (1993)

Number 1 (January) pp 1–72
Number 2 (March) pp 73–144
Number 3 (May) pp 145–224
Number 4 (July) pp 225–304
Number 5 (September) pp 305–400
Number 6 (November) pp 401–472

Article Index

Number 1

Efficient seismic analysis of piping systems with joint deformations
D.-G. Lee and Y.-H. Song 2–12
Inelastic response of torsionally coupled system to an ensemble of nonstationary random ground motion
H. Shakib and T. K. Datta 13–20
Identification of finite element models in structural dynamics
D. Capecchi and F. Vestroni 21–30
Inelastic initial local buckling of plates with and without residual stresses
M. Azhari and M. A. Bradford 31–39
Modification of floor response spectrum based on stochastic sensitivity analysis
Y. Q. Chen 40–46
Lateral load response of setback shear wall buildings
A. Rutenberg and Y. Dickman 47–54
pb-2 Rayleigh–Ritz method for general plate analysis
K. M. Liew and C. M. Wang 55–60
Approximate solution of creep of orthogonal anisotropic concrete thin plates
R.-G. Zhou, Y.-X. Hu, L. Duan and W. F. Chen 61–66

Number 2

On the definition of beam–wall joint rotations in the analysis of coupled wall–frame structures
A. K. H. Kwan 74–82
Axisymmetric free vibration analysis of conical shells
D. P. Thambiratnam and Y. Zhuge 83–89
Aerodynamic stability of a beam in steady flow
H. Pašić and M. Bazdulj 90–96
Amplification factors for piles
U. B. Halabe and S. K. Jain 97–101
Structural design, analysis and full-scale tests of seismically isolated buildings
G. C. Giuliani 102–116
Seismic performance of moment resisting frames with flexible joints
A. Osman, A. Ghobarah and R. M. Korol 117–134
Stochastic sensitivity analysis of primary-secondary structural systems
C. D. Huang, L. Socha and T. T. Soong 135–142

Number 3

Expert systems for seismic engineering: the state-of-the-art
A. Berrais and A. S. Watson 146–154
Seismic response of multistorey framed shearwalls
Y. L. Mo and S. D. Jost 155–166
Definitions of static eccentricity for design of asymmetric shear buildings
W. Jiang, G. L. Hutchinson and A. M. Chandler 167–178
Improved method for frequency domain identifications of structures
Kyu-Seon Hong and Chung-Bang Yun 179–188
A general lower and upper bound theorem of static stability
T. E. Boothby and C. B. Brown 189–196
Measurements of static and dynamic displacement from visual monitoring of the Humber Bridge
G. A. Stephen, J. M. W. Brownjohn and C. A. Taylor 197–208
Stability behaviour of semi-rigid sway frames
Yoshiaki Goto, Satsuki Suzuki and Wai-Fah Chen 209–219

Number 4

Computer-aided design of transmission lines
A. H. Peyrot, E. M. Peyrot and T. Carton 229–238
Optimization methods for transmission line design
A. H. Peyrot, E. M. Peyrot and A. Senouci 239–246
Structural optimization of transmission line conductors
H. B. White 247–250
System reliability analysis of transmission lines
H. J. Dagher and Q. Lu 251–258
Nonlinear finite element analysis of latticed transmission towers
F. G. A. Al-Bermani and S. Kitipornchai 259–270
A review of dynamic aspects of transmission line design
B. W. Smith 271–276
Transmission tower development in the UK
C. Lomas 277–288
Guyed structures for transmission lines
H. B. White 289–302

Number 5

Stochastic response to earthquake forces of a cable-stayed bridge
I. Sungar 307–314
AI and CAD for earthquake damage evaluation
T. T. Shwe and H. Adeli 315–320
Study of wire rope systems for seismic protection of equipment in buildings
G. F. Demetriades, M. C. Constantinou and A. M. Reinhorn 321–334
Seismic response of support-isolated secondary structures in a multistorey structure
Y.-S. Kim and D.-G. Lee 335–348
Parametric studies on the response of equipment in resilient-friction base isolated structures subjected to ground motion
A. G. Hernried and K.-M. Lei 349–358
Calculating the load-deflection behaviour of simply-supported composite slabs with interface slip
K. W. Poh and M. M. Attard 359–368
K-factors of framed columns restrained by tapered girders in US codes
W.-S. King, L. Duan, R.-G. Zhou, Y.-X. Hu and W.-F. Chen 369–378
Least weight design of steel pile foundations
A. S. Hoback and K. Z. Truman 379–386
Mode shape corrections for wind tunnel tests of tall buildings
Y. L. Xu and K. C. S. Kwok 387–394

Number 6

Response of a 42-storey steel-frame building to the $M_s = 7.1$ Loma Prieta earthquake
E. Safak 403–422
Test of screw fastened profiled roofing sheets subject to simulated wind uplift
Y. L. Xu and G. F. Reardon 423–430
A simplified model for the dynamic soil-structure interaction of planar frame-wall systems
G. Oliveto and A. Santini 431–438
Experimental study of the compressive-force concept in prestressed concrete beams
S. M. Seraj, M. D. Kotsovos and M. N. Pavlović 439–452
Geometric effects on shakedown and rachetting of axisymmetric cylindrical shells subjected to variable thermal loading
G. Maier, L. G. Pan and U. Perego 453–465
